

September 25, 2018

Met with Kelsey Maroni RN and Nicole Riehm RN to discuss the need for postpartum depression screening.

We reviewed the Eidenberg Scale form and the need to perform this test on patients prior to discharge. The form should be in print form for the patient and the nurse should allow the patient to fill it out independently.

Kelsey and Nicole will create a survey for the nurses to complete on their knowledge and comfort in their patients care.

Once created, we will meet again for both Kelsey and Nicole to discuss the survey at our daily huddles.

Pat Basicano, Nurse Manager
