**Plan of Care by Marioni, Kelsey E, RN filed on 5/ /2019 6:29 AM.**

Author: Marioni, Kelsey E, RN    Service: Maternal-Fetal Medicine    Author Type: Registered Nurse  
 Filed: 5/ /2019 6:29 AM    Status: Addendum  
 Editor: Marioni, Kelsey E, RN (Registered Nurse)

**Plan of Care Overview/ Patient Status**

Pt recovering well post Csection. Voiding without difficulty. Tolerating diet and passing flatus. Pain controlled with scheduled meds and prn oxy. Ambulating independently. Staples OTA. Educated on baby safety including to place neonate in bassinet when sleeping/sleepy, not to carry baby while ambulating and back to sleep. Instructed to call if pt needs assistance. Asking appropriate questions related to neonate. Newborn channel encouraged. Immunizations for both mom and baby discussed. Pt breastfeeding with assistance. Mom's milk is in. Pt demonstrates improved confidence with baby. Bonding with neonate witnessed. Aware of signs and symptoms to report to RN. Pt verbalizes understanding to teachings. Pt scored a 12 on Edinburgh Postpartum depression scale. Pt with history of depression in past. Willing to speak with social work today. Dr. Kim notified and will place consult. Call bell within reach, name and number on white board. Safety maintained. Kelsey E Marioni, RN 2:03 AM.
