## CNOR Prep Course

This is an interactive course. You will complete six modules and take seven practice tests over the two days.

After class, you will receive 16.0 contact hours and access to a recording of class for two months.

All required handouts will be provided during class. It is not required for class but I recommend access to a good text book and the AORN Recommended Standards of practice aid your study.

You will learn during class how to focus your study and improve your areas of opportunity.

The CNOR exam consists of 9 subject areas:

### 1. Preoperative Patient Assessment and Diagnosis (12%)

The Preoperative Patient Assessment and Diagnosis subject area includes: patient health assessments, medication reviews, the Joint Commission's Universal Protocol, surgical consent, advance directives, patient rights, pain assessment, and development of nursing diagnoses.

### 2. Perioperative Plan of Care (10%)

The Perioperative Plan of Care subject area covers topics such as development of measurable patient outcomes, development of individualized care plans, and incorporation of patient education into the patient's care plan.

### 3. Intraoperative Care (27%)

The Intraoperative Care subject domain consists of patient education of the surgical area, safe medication administration practices, safe patient positioning, surgical site care, asepsis principles, perioperative care during procedures, identification and control of environmental factors, reducing

the risk of complications, preparation and labeling of specimens, performing counts, and maintaining accurate records.

### 4. Communication (10%)

The Communication subject area covers the importance of effective verbal, nonverbal, and written communication including but not limited to hand-off's, SBAR, Universal Protocol, WHO checklist, HIPAA, National Patient Safety Goals, PNDS, and The Joint Commission.

### 5. Transfer of Care (6%)

The Transfer of Care subject domain covers subjects such as transferring of patient care to other team members and planning for the discharge of patients from the facility.

### 6. Instrument Processing and Supply Management (9%)

The Instrument Processing and Supply Management subject area includes questions about principles of infection control, chemical and biological monitoring principles, best practices in the safe handling of hazardous and bio-hazardous materials, and the proper cleaning, disinfecting, packaging, sterilization, transportation, and storage of instruments and supplies.

### 7. Emergency Situations (11%)

The Emergency Situations subject domain consists of questions regarding personal physical complications such as anaphylaxis, cardiovascular emergencies, respiratory complications, and malignant hyperthermia. This domain also includes trauma, fire, mass casualties, terrorism and natural disasters.

### 8. Management of Personnel, Service, and Materials (6%)

The Management of Personnel, Services, and Materials subject area includes all aspects of managing an interdisciplinary

team and ancillary personnel, product evaluation and selection, supply management, cost containment, and environmental consciousness.

### **9. Professional Accountability (9%)**

The Professional Accountability subject domain contains questions such as best practices, regulations, healthy work environment, workplace improvements, quality assurance, patient advocacy, continuing education, professional growth, ethics, and professional standards.
